18. (AS ONCE AMENDED HEREIN) A portable electronic viewer system as set forth in Claim 12, wherein said viewer division has its own specific identification number, wherein said identification number is registered in advance in said portable server division and wherein said identification number is described in an intermediate data file, whereby when the identification number of an intermediate data file sent to said viewer division coincides with the identification number that said viewer division holds, a compressed data is decompressed.

19. (AS NEW HEREIN) A portable electronic viewer system as set forth in Claim 16, wherein a signal comprising the identification number of said viewer division is transmitted from said viewer division to said portable server division, wherein when said signal is received at said portable server division, said signal is collated with the identification number of a viewer registered therein and wherein when said collation determines that said identification numbers coincide with each other, a publication signal is described in an intermediate data file.

20. (AS NEW HEREIN) A portable electronic viewer system as set forth in Claim 13, wherein said viewer division has its own specific identification number, wherein said identification number is registered in advance in said portable server division and wherein said identification number is described in an intermediate data file, whereby when the identification number of an intermediate data file sent to said viewer division coincides with the identification number that said viewer division holds, a compressed data is decompressed.
